If someone contributed to the thesis... might be good to thank them here.

Abstract

An abstracts abstracts the thesis!

Contents

Outline of the Thesis

Part I: Introduction

CHAPTER 1: INTRODUCTION This chapter presents an overview of the thesis and it purpose. Furthermore, it will discuss the sense of life in a very general approach.

CHAPTER 2: RELATED WORK Related Work

CHAPTER 3: PROBLEM DEFINITION Problem Definition

Part II: Theoretical Background

CHAPTER 1: CLASSIFICATION METHODS

CHAPTER 2: TEXT REPRESENTATION

CHAPTER 3: ENSEMBLE LEARNING

Part III: Experiments

CHAPTER 1: EXPERIMENTS

CHAPTER 2: APPLICATION

CHAPTER 3: RESULTS

Part IV: Conclusion

CHAPTER 1: CONCLUSION

Part I.

Introduction

1. Introduction

Here starts the thesis with an introduction. Please use nice latex and bibtex entries [**?**]. Do not spend time on formating your thesis, but on its content.

1.1. Latex Introduction

There is no need for a latex introduction since there is plenty of literature out there.

2. Related Work

Related Work goes here

3. Problem Definition

Define the problem here

Part II.

Methodology

4. Classification Methods

4.1. Introduction

Classification, involving the separation of data between two or more classes, is one of the fundamental problems in machine learning. Theoretically, we are given a dataset D, wherein each sample.

5. Text Representation

Text Representation

6. Ensemble Learning

Describe Ensemble Learning here

Part III.

Experimental Results

7. Experiments

Experiment settings, dataset, system built, approach, and everything practical goes here

8. Application

Documentation about the system goes here

9. Results

Results

Part IV.

Conclusion

10. Conclusion
